05 AV8SS BIG WINNERS:

American V-8 Supercar Series races are open to all front engine rear drive cars of any make from anywhere, and includes many Mustang racers from around the country driving cars with chassis systems from various manufactures. Some of these racers are well know internet hacks, supposed web gurus of speed. Yet, again, GR40 Mustangs prove superior.

Unlimited Class.

**Lester Lesneski,
Monroe, North Carolina
03 GR40 SLA Cobra SC**

Driving his beautiful flaming red and black GR40 SLA equipped supercharged Mustang, Lester entered as many races as his circumstances would allow, and was dominant at each event he entered. Lester won every race he finished by a wide margin. A broken driveshaft sidelined him once, and later a crash ended his run for the cup too early in the year. Still, we congratulate Lester and his crew for a dominant showing when he ran. Lester, we hope you can return to the series full time next year.

The Champion:

Barry Kline

Golden Valley, Minnesota 1998 GR40 SLA Cobra

Congratulations are due for winning the inaugural American V-8 Supercar Series Championship in fine form. After upgrading his GR40 Cobra to the new SLA system Barry won the final race of the year at Nashville Super Speedway, finishing ahead of Pete

Johns in his near Nextel Cup Firebird and held off a late charge from a very well prepared Corvette Z06.

Thank you Barry and Lester for showing that GR40 coupled with hard work, rather than hype, web surfing and blogging is what wins.
